Building effective quizzes in CANVAS

Presented at UW-Superior's Enhancement Day January 16, 2020

Steve Baule & Stephanie Polkowski Department of Education

Objectives

This presentation will walk participants through building a quiz in CANVAS. It will cover the various aspects:

Osetting a quiz up

 determining how to set time and randomization parameters

Oprovide for alternative "correct answers"

• best practices in developing online quizzes

Quiz Basics

Before You Start

Be able to answer the following:

- O Graded v. Practice Quiz; Also could be a survey
- Will it be added to an Assignment Group?
- O Do you want randomized questions? Randomized answers?
- Time limit?
- Multiple attempts?
- Show students answers?
- Require an access code or restrict IP address?

Search for a Test Bank

Publisher test banks for use with Respondus applications are available for many of the leading textbooks in higher education. Instructors who adopt a participating textbook can obtain a ready-to-use test bank that is compatible with their Respondus or Respondus LE software.

Use the search form below to see which textbooks are available.

Textbook Title

Author's Last Name
Keywords (Discipline, Course Name, etc.)
Search by publisher
All Publishers

Some Cautions

Analytics are not available for quizzes over 100 questions
 Analytics is available for up to 1000 attempts (for those with multiple attempts)
 Some grade analysis requires at least five student

responses

CANVAS Quiz Analytics

Student Analytics Report

A CSV file including all student answers identified as correct or incorrect
N correct for each student
N incorrect for each student
Total score for each student

Item Analysis Report

- o question ID
- o question title
- answered student count
- top student count (students in the top 27%)
- middle student count (students in the middle 46%)
- bottom student count (students in the bottom 27%)
- quiz question count (total number of quiz questions)
- correct student count (number of total students who got the answer right)
- wrong student count (number of total students who got the answer wrong)

Item Analysis, cont.

- correct student ratio (ratio of students who got the answer right)
- wrong student ratio (ratio of students who got the answer wrong)
- correct top student count (students in the top 27% who got the answer right)
- correct middle student count (students in the middle 46% who got the answer right)
- correct bottom student count (students in the bottom 27% who got the answer right)
- variance (of scores on this question)
- standard deviation (of scores on this question) difficulty index
- alpha score (for the whole exam)
- point biserial of the correct answer (reliability index)
- point biserial of the first incorrect answer or distractor (followed by the second, etc.)
